C.C.C. Kei Tsun Primary School

December 2023

Principal's Message

Principal Yip

"Hi everyone! Welcome to Kei Tsun Primary School! It's my pleasure and honor to extend the warmest greetings to you. Our school aims to help students fulfill their dreams by providing various learning experiences to discover and develop their talents and interests. We actively encourage their participation and engagement in different opportunities. Additionally, we offer extracurricular activities that cater to multiple intelligences, such as music, Chinese drama, gardening, STEAM & Maker, the football team, the basketball team, and the choir.

Our dedicated staff sustains the school by providing a quality and holistic education for our students, helping them strive for excellence in learning. Let's shine a light on our students and share in their happiness and achievements in school life!

Wishing everyone a great year ahead!"

Words from our Net teacher, Mr. Jason

At C.C.C. Kei Tsun Primary School, communicative English language learning is our main focus. The skills of reading, speaking, listening and writing are taught interactively and through real-life situations. We guide our students to develop their ability to transfer knowledge to new situations.

With the implementation of Space Town in P.1-P.3, our teaching of reading has been enhanced through the earlier introduction of phonics strategies such as blending and decoding. Meanwhile, we teach our students a variety of reading skills through guided reading and help them grow into independent readers.

We encourage our parents to support their children's English learning with our home reading scheme. Students are matched to books at their appropriate reading-level. Setting aside time for reading English books is the key to improving everyone's English ability!

KNOWLEDGE AND INQUIRY-BASED LEARNING

A positive learning environment is one of the most critical components of a skilled-based classroom. In light of this, the school engages students with distinctive school-based courses and various teaching activities, thereby promoting whole-person development of our students.

Let me code a game.

Come and join our overseas exchange programme.

STEAM DAY!

Our School-based Chinese curriculum for P.1-P.3

TRANSCENDENT TALENTS AND ACHIEVEMENTS

Every Kei Tsun student has a talent to encourage. The students are thankful to have performed in brilliant competitions and events not only within the school but also through other associations: in music, in drama, in sports, in STEAM and many more. Some teams extended impressive winning streaks which demonstrated how unique everyone is.

Let's play Djembe together.

See how well we dance.

We are the basketball winners.

We love STEAM!

Passion for Art

We believe that art is a powerful means of communication that can evoke emotions, ignite imaginations and foster innovations. The school offers different art courses to students with the goal of encouraging creativity and helping them design their own artworks. Join us to unlock your creative spirit and explore a different side of self-expression through art.

Let us perform Handchime for you.

Nothing is impossible!

The Art Tour at K11 MUSEA is amazing!

We create our own costumes.

Serving with Enthusiasm and Virtues

Fostering whole-person development and according higher priority to values education are the key principles of the school. In line with the principles of the Bible, we encourage students to serve others and cultivate positive qualities through moral education classes and a variety of activities. We firmly believe that students who embody integrity and respect for others will become dedicated members of society.

We are the perfect Prefect.

We are making reusable papers.

Let us explore our Community.

Have you visited the Hung Sing Temple before?
